Each survey reproduces the text shown to participants in Qualtrics; consent forms are omitted. Each box is one survey screen. Values piped in by Qualtrics are filled in; 5 or 10 years was randomized across participants, and bracketed terms in blue (e.g., [round number]) vary by round. Charts are examples of the displays participants saw.

Main Experiment

Prolific ID

What is your Prolific ID?

Please note that this response should auto-fill with the correct ID

Instructions

Welcome to our study! This is a 25-minute decision-making survey, and you'll earn \$5 just for completing it. Plus, you might get an extra bonus (up to \$3) depending on your decisions and some luck.

The instructions start on the next page. Please read them carefully. We will test your understanding of the instructions, and you need to pass our comprehension checks in order to proceed to the decisions.

Understanding Stock Price Charts

The survey has 20 rounds. In each round, we'll show you a chart that tracks a company's stock price over a 12-month period in the past 5 or 10 years (see an example below).

Here's what you need to know:

- Every dot on the chart shows the stock price at the end of the last trading day of a specific month.
- The stock price in Month 0 is set at 100 points.
- All other prices are compared to the Month 0 price. For example, if Month -6 shows 90, it means six months before, the stock price was 10% lower than what it was at Month 0.
- The prices have adjusted for dividends, stock splits, and other rare events.

Your Tasks in Each Round

In each round, you have four tasks.

Task 1: Risk Assessment

- You'll assess how risky the stock is by clicking on a slider like the one below. 10 is extremely risky, 0 is not risky at all.

How risky is this stock?

Not risky at all Extremely risky

0 1 2 3 4 5 6 7 8 9 10

Task 2: Investing in the Stock

- You can invest in the stock by buying some shares at Month 0 and selling them at Month 3.
- Any dollar invested will become $(\text{Price at Month 3} / 100)$ dollars.
- Any dollar not invested will keep its value unchanged.
- You'll decide what % of a \$3 endowment to invest in the stock by clicking on a slider like the one below.

What % of \$3 do you want to invest in this stock?

0% 10 20 30 40 50 60 70 80 90 100%

Task 3: Predicting the Stock Price

- You'll guess the stock price for Month 3. Just click on the slider where you think the price will be. (Below is an example.)
- For instance, if you think the price will go up by 10%, click at the point corresponding to 110. If you expect a 5% drop, click at 95.

Task 4: How Confident Are You?

- After predicting, tell us how sure you are about your prediction by clicking on a slider like the one below.
- Specifically, tell us how likely you think that your prediction is less than 5 points off.
- If you're totally confident, then click on 100%. The more doubt you have, the lower the percentage you should answer.

The Real Charts and Your Bonus

- Among all the charts you'll see, 10 are based on a real company's stock price from the past 5 or 10 years. Others are made up.
- Your bonus is determined by one of the tasks for a real chart.
- We won't tell you which charts are real or which task counts for bonus, so treat each chart and each task seriously.
- **The key to earning a bonus is** to give your best, most accurate answers in every part of the experiment.

Below are some details on how the bonus is determined in case you are curious. You don't have to read them and we won't test you on them.

- Task 1 (Risk Assessment) won't affect your bonus. If Task 2 (Investment) determines your bonus, then your bonus will equal the value of your endowment resulted from your investment decision.
- If Task 3 (Prediction) or Task 4 (Confidence) determines your bonus, then your bonus will be either \$3 or 0. The chances of bonus depend on:
 - Accuracy in Prediction: The closer your prediction is to the actual Month 3 price, the better your chances for a bonus.
 - True Confidence: Being honest about your confidence in the prediction increases your bonus chances.

Before starting the study, we need to test your understanding of the instructions. Click Next when you are ready. Once you click Next, you can't come back to the instructions.

Comprehension Checks

How many stock price charts you will see are from a real company?

- ☐ All of them
- ☐ 10
- ☐ None

Shown only if the previous answer was incorrect.

Your answer is incorrect. Please answer again.

How many stock price charts you will see are from a real company?

- ☐ All of them
- ☐ 10
- ☐ None

Which price chart will matter for your bonus?

- ☐ All of them
- ☐ One from a real company
- ☐ None of them

Shown only if the previous answer was incorrect.

Your answer is incorrect. Please answer again.

Which price chart will matter for your bonus?

- ☐ All of them
- ☐ One from a real company
- ☐ None of them

Suppose that you invest $1/3$ of your \$3 endowment in the stock. At Month 3, the stock price is 150 points. What is the value of your endowment resulted from the investment decision?

- ☐ $\$3 * 150 / 100 = \4.50
- ☐ $1/3 * \$3 * 150 / 100 + 2/3 * \$3 = \$3.50$
- ☐ $1/3 * \$3 * 150 / 100 = \1.50
- ☐ \$3

Shown only if the previous answer was incorrect.

Your answer is incorrect. Please answer again.

Suppose that you invest $1/3$ of your \$3 endowment in the stock. At Month 3, the stock price is 150 points. What is the value of your endowment resulted from the investment decision?

- ☐ $\$3 * 150 / 100 = \4.50
- ☐ $1/3 * \$3 * 150 / 100 + 2/3 * \$3 = \$3.50$
- ☐ $1/3 * \$3 * 150 / 100 = \1.50
- ☐ \$3

Which of the following will help you get a higher bonus?

- ☐ Strategically manipulate your answers up or down
- ☐ Answer questions randomly
- ☐ Give your most accurate answer to every question

Shown only if the previous answer was incorrect.

Your answer is incorrect. Please answer again.

Which of the following will help you get a higher bonus?

- ☐ Strategically manipulate your answers up or down
- ☐ Answer questions randomly
- ☐ Give your most accurate answer to every question

You have passed the understanding checks. Please click Next to proceed to the first stock price chart.

Main Task (repeated in every round)

Round [round number]

Please read the stock price chart below and answer the following questions.

How risky is this stock?

What % of \$3 do you want to invest in this stock?

What will the stock price at Month 3 be? Click on the following slider to indicate your prediction.

How confident are you that your prediction is within 5 points of the actual stock price?

Open-Ended Questions

You have completed all the tasks!

If you can, please tell us what kinds of stock price charts feel risky to you?

If you can, please tell us what kinds of stock price charts make you feel unconfident in your predictions?

Demographics

At the end of the survey, we would like to know more about you.

How old are you?

- ☐ Under 18
 - ☐ 18-24 years old
 - ☐ 25-34 years old
 - ☐ 35-44 years old
 - ☐ 45-54 years old
 - ☐ 55-64 years old
 - ☐ 65+ years old
-

How do you describe yourself?

- ☐ Male
 - ☐ Female
 - ☐ Non-binary / third gender
 - ☐ Prefer to self-describe _____
 - ☐ Prefer not to say
-

What best describes your employment status over the last three months?

- ☐ Working full-time
- ☐ Working part-time
- ☐ Unemployed and looking for work
- ☐ A homemaker or stay-at-home parent
- ☐ Student
- ☐ Retired
- ☐ Other

What is the highest level of education you have completed?

- ☐ Some high school or less
- ☐ High school diploma or GED
- ☐ Some college, but no degree
- ☐ Associates or technical degree
- ☐ Bachelor's degree
- ☐ Graduate or professional degree (MA, MS, MBA, PhD, JD, MD, DDS etc.)
- ☐ Prefer not to say

What was your total household income before taxes during the past 12 months?

- ☐ Less than \$25,000
- ☐ \$25,000-\$49,999
- ☐ \$50,000-\$74,999
- ☐ \$75,000-\$99,999
- ☐ \$100,000-\$149,999
- ☐ \$150,000 or more
- ☐ Prefer not to say

Are you familiar with probability and statistics?

- ☐ Very familiar
- ☐ Somewhat familiar
- ☐ Neither familiar nor unfamiliar
- ☐ Somewhat unfamiliar
- ☐ Very unfamiliar

How willing are you to take risks?

- ☐ Very willing
- ☐ Willing
- ☐ Neither willing nor unwilling
- ☐ Unwilling
- ☐ Very unwilling

Have you invested in stocks (not counting retirement savings plans)?

- ☐ Yes
- ☐ No

Financial Knowledge

How well do you know about the US stock market?

- ☐ Not well at all
 - ☐ Slightly well
 - ☐ Moderately well
 - ☐ Very well
 - ☐ Extremely well
-

How often do you trade stocks?

- ☐ Almost daily
 - ☐ A couple times a week
 - ☐ Once a week
 - ☐ A couple times a month
 - ☐ Less than once a month
-

How often do you watch the price movement of stocks?

- ☐ Almost daily
 - ☐ A couple times a week
 - ☐ Once a week
 - ☐ A couple times a month
 - ☐ Less than once a month
-

How far back do you typically review a stock's price history when examining its past performance?

- ☐ 1 day
- ☐ 1 week
- ☐ 1 month
- ☐ 1 quarter
- ☐ 1 year or longer

How often do you use technical analysis methods to predict future stock prices?

- ☐ Never
- ☐ Sometimes
- ☐ About half the time
- ☐ Most of the time
- ☐ Always

Instructions

Welcome to our study! This is a 15-minute decision-making survey, and you'll earn \$3 just for completing it. Plus, you might get an extra bonus (up to \$3) depending on your decisions and some luck.

The instructions start on the next page. Please read them carefully. We will test your understanding of the instructions, and you need to pass our comprehension checks in order to proceed to the decisions.

Understanding Stock Price Charts

The survey has 20 rounds. In each round, we'll show you a chart that tracks a company's stock price over a 12-month period in the past 5 or 10 years (see an example below).

Here's what you need to know:

- Every dot on the chart shows the stock price at the end of the last trading day of a specific month.
- The stock price in Month 0 is set at 100 points.
- All other prices are compared to the Month 0 price. For example, if Month -6 shows 90, it means six months before, the stock price was 10% lower than what it was at Month 0.
- The prices have adjusted for dividends, stock splits, and other rare events.

Your Bonus

- After completing the survey, you may receive a **\$3** bonus, depending on one price chart you encounter in the study.
- This chart that determines your bonus is **based on a real company's stock price** from the past **5 or 10** years. We will not tell you which chart it is.
- Your chance of receiving the bonus depends on one of two tasks related to this price chart.

Task 1: Predicting the Stock Price

- You'll make a forecast on the stock price for Month 3 by clicking on the dashed line in the chart.
- For instance, if you think the price will go up by 10%, click at the point corresponding to 110. If you expect a 5% drop, click at 95.

Please try it out using the example chart below.

Your forecast is: _____

Task 2: How Confident Are You about Your Forecast?

- After predicting, tell us how likely you think that your forecast is less than 5 points off.
- If you're totally confident, then click on 100%. The more doubt you have, the lower the percentage you should answer.

Please try this task in the example below.

Your previous forecast: [forecast]

How confident are you that your forecast is within 5 points of the actual stock price?

Your Bonus

- Your bonus is either \$3 or \$0.
- **The more accurate your forecasts and confidence answers are, the more likely you are to receive the \$3 bonus.**

If you are interested in the details of how the bonus is determined, you may click the button below. You will **not** be tested on these details.

Show bonus details

Your bonus depends on either a forecast or a confidence assessment answer.

- If your bonus depends on a **forecast**, then the closer your forecast is to the actual Month 3 stock price, the more likely you are to receive \$3. To maximize your chance of earning the bonus, your forecast should reflect **where you believe the price is most likely to end up on average**.
- If your bonus depends on a **confidence answer**, then the closer your confidence is to the actual likelihood that the price falls close to your forecast, the more likely you are to receive \$3. To maximize your chance of earning the bonus, you should answer the confidence question based on **your best assessment of how likely the price falls close to your forecast**.

Before starting the study, we need to test your understanding of the instructions. Click Next when you are ready. Once you click Next, you can't come back to the instructions.

Comprehension Checks

Which statement is true about the price chart that determines your bonus?

- ☐ The price chart is made up by the researchers
- ☐ The price chart is based on a real company's stock prices

Which of the following can increase your chance of receiving the \$3 bonus?

- ☐ Make accurate forecasts about Month 3 prices
- ☐ Make accurate confidence assessments about your forecasts
- ☐ Both of the above

You have passed the understanding checks. Please click Next to proceed to the first stock price chart.

Main Task (repeated in every round)

Understanding Stock Price Charts

The survey has 20 rounds. In each round, we'll show you a chart that tracks a company's stock price over a 12-month period in the past 5 or 10 years (see an example below).

Here's what you need to know:

- Every dot on the chart shows the stock price at the end of the last trading day of a specific month.
- The stock price in Month 0 is set at 100 points.
- All other prices are compared to the Month 0 price. For example, if Month -6 shows 90, it means six months before, the stock price was 10% lower than what it was at Month 0.
- The prices have adjusted for dividends, stock splits, and other rare events.

Your Bonus

- After completing the survey, you may receive a **\$3** bonus, depending on one price chart you encounter in the study.
- This chart that determines your bonus is **based on a real company's stock price** from the past **5 or 10** years. We will not tell you which chart it is.
- Your chance of receiving the bonus depends on one of two tasks related to this price chart.

Task 1: Predicting the Stock Price

- You'll make a forecast on the stock price for Month 3 by clicking on the dashed line in the chart.
- For instance, if you think the price will go up by 10%, click at the point corresponding to 110. If you expect a 5% drop, click at 95.

Please try it out using the example chart below.

Your forecast is: _____

Task 2: How likely is it that your forecast is over-optimistic by a lot?

- After predicting, tell us how likely you think it is that your forecast is **over-optimistic by more than 20 points** (that is, the actual price ends up more than 20 points below your forecast).
- If you believe this is impossible, select 0%. The more likely you think this outcome is, the higher the percentage you should choose.

Please try this task in the example below.

Your previous forecast: [forecast]

How likely is it that your forecast is over-optimistic by more than 20 points?

Your Bonus

The bonus rule is designed so that **the more accurate your forecasts and your assessments of potential over-optimism are, the more likely you are to receive the \$3 bonus.**

If you are interested in the details of how the bonus is determined, you may click the button below. You will **not** be tested on these details.

Show bonus details

- If your bonus depends on a **forecast**, then the closer your forecast is to the actual Month 3 stock price, the more likely you are to receive the bonus. To maximize your chance of earning the bonus, your forecast should reflect **where you believe the price is most likely to end up on average.**
- If your bonus depends on an **assessment of potential over-optimism**, then the closer your answer is to the actual likelihood that the price falls far below your forecast, the more likely you are to receive the bonus. To maximize your chance of earning the bonus, you should answer this question based on **your best assessment of how likely the price falls far below your forecast.**

Before starting the study, we need to test your understanding of the instructions. Click Next when you are ready. Once you click Next, you can't come back to the instructions.

Comprehension Checks

Which statement is true about the price chart that determines your bonus?

- ☐ The price chart is made up by the researchers
- ☐ The price chart is based on a real company's stock prices

Which of the following can increase your chance of receiving the \$3 task bonus?

- ☐ Make accurate forecasts about Month 3 prices
- ☐ Make accurate assessments of the likelihood that your forecast is over-optimistic
- ☐ Both of the above

You have passed the understanding checks. Please click Next to proceed to the first stock price chart.

Instructions

Welcome to our study! This is a 15-minute decision-making survey, and you'll earn \$3 just for completing it. Plus, you might get an extra bonus (up to \$4) depending on your decisions and some luck.

The instructions start on the next page. Please read them carefully. We will test your understanding of the instructions, and you need to pass our comprehension checks in order to proceed to the decisions.

Understanding Stock Price Charts

The survey has 20 rounds. In each round, we'll show you a chart that tracks a company's stock price over a 12-month period in the past 5 or 10 years (see an example below).

Here's what you need to know:

- Every dot on the chart shows the stock price at the end of the last trading day of a specific month.
- The stock price in Month 0 is set at 100 points.
- All other prices are compared to the Month 0 price. For example, if Month -6 shows 90, it means six months before, the stock price was 10% lower than what it was at Month 0.
- The prices have adjusted for dividends, stock splits, and other rare events.

Your Bonus

- The bonus you receive after completing the survey will depend on one price chart you encounter in the study.
- This chart that determines your bonus is **based on a real company's stock price** from the past **5 or 10** years. We will not tell you which chart it is.
- Your bonus consists of two parts: **Investment Bonus** and **Forecast Bonus**

Investment Bonus

- Your investment bonus depends on your **investor type** and the **stock price at Month 3**.
- If your investor type is a **long investor**, then the higher the Month 3 stock price, the **higher** your investment bonus. Specifically, long investor's investment bonus = Month 3 stock price / 100
- If your investor type is a **short seller**, then the higher the Month 3 stock price, the **lower** your investment bonus. Specifically, short seller's investment bonus = (200 - Month 3 stock price) / 100
- In other words, long investors are rooting for the stock, whereas short sellers are betting against the stock.

Please click the button below to reveal your investor type.

Reveal investor type

(The wheel will stop on your assigned type.)

Shown to participants assigned to be long investors.

You are a **Long Investor**.

This means that your investment bonus **increases** as the Month 3 stock price gets higher.

Shown to participants assigned to be short sellers.

You are a **Short Seller**.

This means that your investment bonus **decreases** as the Month 3 stock price gets higher.

Forecast Bonus

- You'll make a forecast on the stock price for Month 3 by clicking on the dashed line in the chart.
- For instance, if you think the price will go up by 10%, click at the point corresponding to 110. If you expect a 5% drop, click at 95.
- The more accurate is your forecast, the more likely you will receive a \$3 forecast bonus.

Please try it out using the example chart below.

Your forecast is: _____

How Risky is the Stock?

- After predicting, tell us how risky you think the stock is.
- 10 is extremely risky, 0 is not risky at all.

Please try this task in the example below.

Your previous forecast: [\[forecast\]](#)

How risky is this stock?

Before starting the study, we need to test your understanding of the instructions. Click Next when you are ready. Once you click Next, you can't come back to the instructions.

Comprehension Checks

Which statement is true about the price chart that determines your bonus?

- ☐ The price chart is made up by the researchers
- ☐ The price chart is based on a real company's stock prices

For the stock price chart that determines your bonus, which of the following statement is true?

- ☐ The higher the Month 3 price, the higher my investment bonus
- ☐ The higher the Month 3 price, the lower my investment bonus

For the stock price chart that determines your bonus, which of the following statement is true?

- ☐ The higher the Month 3 price, the higher my investment bonus
- ☐ The higher the Month 3 price, the lower my investment bonus

Is the following statement true: The more accurate are my stock price forecasts, the more likely I will receive the \$3 forecast bonus?

- ☐ True
- ☐ False

You have passed the understanding checks. Please click Next to proceed to the first stock price chart.

If you can, please tell us what kinds of price charts make the stock feel risky to you?

Demographics

At the end of the survey, we would like to know more about you.

How old are you?

- ☐ Under 18
 - ☐ 18-24 years old
 - ☐ 25-34 years old
 - ☐ 35-44 years old
 - ☐ 45-54 years old
 - ☐ 55-64 years old
 - ☐ 65+ years old
-

How do you describe yourself?

- ☐ Male
 - ☐ Female
 - ☐ Non-binary / third gender
 - ☐ Prefer to self-describe _____
 - ☐ Prefer not to say
-

What best describes your employment status over the last three months?

- ☐ Working full-time
- ☐ Working part-time
- ☐ Unemployed and looking for work
- ☐ A homemaker or stay-at-home parent
- ☐ Student
- ☐ Retired
- ☐ Other

What is the highest level of education you have completed?

- ☐ Some high school or less
 - ☐ High school diploma or GED
 - ☐ Some college, but no degree
 - ☐ Associates or technical degree
 - ☐ Bachelor's degree
 - ☐ Graduate or professional degree (MA, MS, MBA, PhD, JD, MD, DDS etc.)
 - ☐ Prefer not to say
-

What was your total household income before taxes during the past 12 months?

- ☐ Less than \$25,000
 - ☐ \$25,000-\$49,999
 - ☐ \$50,000-\$74,999
 - ☐ \$75,000-\$99,999
 - ☐ \$100,000-\$149,999
 - ☐ \$150,000 or more
 - ☐ Prefer not to say
-

Are you familiar with probability and statistics?

- ☐ Very familiar
 - ☐ Somewhat familiar
 - ☐ Neither familiar nor unfamiliar
 - ☐ Somewhat unfamiliar
 - ☐ Very unfamiliar
-

How willing are you to take risks?

- ☐ Very willing
 - ☐ Willing
 - ☐ Neither willing nor unwilling
 - ☐ Unwilling
 - ☐ Very unwilling
-

Have you invested in stocks (not counting retirement savings plans)?

- ☐ Yes
- ☐ No

Financial Knowledge

How well do you know about the US stock market?

- ☐ Not well at all
 - ☐ Slightly well
 - ☐ Moderately well
 - ☐ Very well
 - ☐ Extremely well
-

How often do you trade stocks?

- ☐ Almost daily
 - ☐ A couple times a week
 - ☐ Once a week
 - ☐ A couple times a month
 - ☐ Less than once a month
-

How often do you watch the price movement of stocks?

- ☐ Almost daily
 - ☐ A couple times a week
 - ☐ Once a week
 - ☐ A couple times a month
 - ☐ Less than once a month
-

How far back do you typically review a stock's price history when examining its past performance?

- ☐ 1 day
- ☐ 1 week
- ☐ 1 month
- ☐ 1 quarter
- ☐ 1 year or longer

How often do you use technical analysis methods to predict future stock prices?

- ☐ Never
- ☐ Sometimes
- ☐ About half the time
- ☐ Most of the time
- ☐ Always

End of Survey

Thank you for your answer!

You've reached the end of the survey. Your payment will be processed in two days. Please click Next to be redirected to Prolific.

Chosen-Order Experiment

Survey instrument

Prolific ID

What is your Prolific ID?

Please note that this response should auto-fill with the correct ID

Instructions

Welcome to our study! This is a 20-minute decision-making survey, and you'll earn \$4 just for completing it. Plus, you might get an extra bonus (up to \$3) depending on your decisions and some luck.

The instructions start on the next page. Please read them carefully. We will test your understanding of the instructions, and you need to pass our comprehension checks in order to proceed to the decisions.

Understanding Stock Price Charts

The survey has 20 rounds. In each round, you will encounter a chart that tracks a company's stock price over a 12-month period in the past 5 or 10 years (see an example below).

Here's what you need to know:

- Every dot on the chart shows the stock price at the end of the last trading day of a specific month.
- The stock price in Month 0 is set at 100 points.
- All other prices are compared to the Month 0 price. For example, if Month -6 shows 90, it means six months before, the stock price was 10% lower than what it was at Month 0.
- The prices have adjusted for dividends, stock splits, and other rare events.

Revealing the Price Chart

- At the start of each round, you will not see the full price chart. Instead, you need to click the “show” buttons below the chart to reveal the monthly price movements one by one.
- Each button corresponds to a month.
- The arrow indicates the direction of the price change during that month (↗ = increased, ↘ = decreased).
- **Important:** In some rounds, you can only reveal a fixed number (< 12) of monthly price movements; any month that is not revealed when you hit the cap will stay hidden.

Below is the screenshot of the start of a round.

Click on the "show" button below a month to reveal the price movement of that month.

Forecasting the Stock Price for Month 3

- After you finish revealing the price chart, you'll make a forecast on the stock price for Month 3 by clicking on the dashed line in the chart.
- For instance, if you think the price will go up by 10%, click at the point corresponding to 110. If you expect a 5% drop, click at 95.

Below is a example screenshot.

Click on the "show" button below a month to reveal the price movement of that month.

Assessing Confidence in Your Forecast

- After forecasting, please tell us how likely you think that your forecast is less than 5 points off.
- If you're totally confident, then click on 100% on the slider. The more doubt you have, the lower the percentage you should answer.

Below is the screenshot of the confidence question.

How confident are you that your forecast is within 5 points of the actual stock price?

Your Bonus

- After completing the survey, you may receive a \$3 bonus. Your **chance of receiving the bonus** depends on the **accuracy of either the forecast or the confidence assessment** you make about a price chart.
- The chart that determines your bonus is **based on a real company's stock price** from the past **5 or 10** years. We will not tell you which chart it is, so you should **treat every chart seriously** when you make forecasts and confidence assessments.
- Because you may not be able to reveal all 12 monthly price movements before making your forecast, you should **reveal first the months that you think are most helpful for improving the accuracy** of your forecasts and confidence assessments.

If you are interested in the details of how the bonus is determined, you may click the button below. You will **not** be tested on these details.

Show bonus details

- If your bonus depends on a **forecast**, then the closer your forecast is to the actual Month 3 stock price, the more likely you are to receive the bonus. To maximize your chance of earning the bonus, your forecast should reflect **where you believe the price is most likely to end up on average**.
- If your bonus depends on a **confidence answer**, then the closer your confidence is to the actual likelihood that the price falls close to your forecast, the more likely you are to receive the bonus. To maximize your chance of earning the bonus, you should answer the confidence question based on **your best assessment of how likely the price falls close to your forecast**.

Practice Round

Please try out the tasks using the example chart below. Your answers in this practice round will not affect your bonus.

Click on the "show" button below a month to reveal the price movement of that month.

Your forecast is: _____

Click on the "show" button below a month to reveal the price movement of that month.

Your previous forecast: [\[forecast\]](#)

How confident are you that your forecast is within 5 points of the actual stock price?

Before starting the real rounds, we need to test your understanding of the instructions. Click Next when you are ready. Once you click Next, you can't come back to the instructions.

Comprehension Checks

What does the arrow on a "show" button under a month indicate?

- ☐ It does not mean anything
- ☐ It indicates the direction of the price change during that month (↗ = increased, ↘ = decreased)

Which statement is true about the price chart that determines your bonus?

- ☐ The price chart is made up by the researchers
- ☐ The price chart is based on a real company's stock prices

Which of the following can increase your chance of receiving the \$3 bonus?

- ☐ Make accurate forecasts about Month 3 prices
- ☐ Make accurate confidence assessments about your forecasts
- ☐ Reveal first the monthly price movements that are most helpful for improving the accuracy of your forecasts and confidence assessments
- ☐ All of the above

You have passed the understanding checks. Please click Next to proceed to the first stock price chart.

Main Task (repeated in every round)

Instructions

Welcome to our study! This is a 20-minute decision-making survey, and you'll earn \$4 just for completing it. Plus, you might get an extra bonus (up to \$3) depending on your decisions and some luck.

The instructions start on the next page. Please read them carefully. We will test your understanding of the instructions, and you need to pass our comprehension checks in order to proceed to the decisions.

Understanding Stock Price Charts

The survey has 20 rounds. In each round, you will encounter a chart that tracks a company's stock price over a 12-month period in the past 5 or 10 years (see an example below).

Here's what you need to know:

- Every dot on the chart shows the stock price at the end of the last trading day of a specific month.
- The stock price in Month 0 is set at 100 points.
- All other prices are compared to the Month 0 price. For example, if Month -6 shows 90, it means six months before, the stock price was 10% lower than what it was at Month 0.
- The prices have adjusted for dividends, stock splits, and other rare events.

Revealing the Price Chart and Making a Forecast

- At the start of each round, you will not see the full price chart. Instead, you need to click the “show” button below the chart to reveal the monthly price movements one at a time.
- After you reveal each monthly price movement at least once, you'll make a forecast on the stock price for Month 3 by clicking on the dashed line in the chart.
- For instance, if you think the price will go up by 10%, click at the point corresponding to 110. If you expect a 5% drop, click at 95.

Please try out the task for the example chart below.

Click the "show" button to reveal the next monthly price movement.

Your forecast is: _____

Assessing Confidence in Your Forecast

- After forecasting, please tell us how likely you think that your forecast is less than 5 points off.
- If you're totally confident, then click on 100% on the slider. The more doubt you have, the lower the percentage you should answer.
- If you want, you can still click the "show" button to reveal price movements one month at a time before assessing your confidence.

Please try out this task for the example chart below.

Click the "show" button to reveal the next monthly price movement.

Your previous forecast: [forecast]

How confident are you that your forecast is within 5 points of the actual stock price? (If you want, you can still click the "show" button above to reveal price movements one month at a time.)

Your Bonus

- After completing the survey, you may receive a \$3 bonus. Your **chance of receiving the bonus** depends on the **accuracy of either the forecast or the confidence assessment** you make about a price chart.
- The chart that determines your bonus is **based on a real company's stock price** from the past **5 or 10** years. We will not tell you which chart it is, so you should **treat every chart seriously** when you make forecasts and confidence assessments.

If you are interested in the details of how the bonus is determined, you may click the button below. You will **not** be tested on these details.

Show bonus details

- If your bonus depends on a **forecast**, then the closer your forecast is to the actual Month 3 stock price, the more likely you are to receive the bonus. To maximize your chance of earning the bonus, your forecast should reflect **where you believe the price is most likely to end up on average**.
- If your bonus depends on a **confidence answer**, then the closer your confidence is to the actual likelihood that the price falls close to your forecast, the more likely you are to receive the bonus. To maximize your chance of earning the bonus, you should answer the confidence question based on **your best assessment of how likely the price falls close to your forecast**.

Before starting the real rounds, we need to test your understanding of the instructions. Click Next when you are ready. Once you click Next, you can't come back to the instructions.

Comprehension Checks

Which statement is true about the price chart that determines your bonus?

- ☐ The price chart is made up by the researchers
- ☐ The price chart is based on a real company's stock prices

Which of the following can increase your chance of receiving the \$3 bonus?

- ☐ Make accurate forecasts about Month 3 prices
- ☐ Make accurate confidence assessments about your forecasts
- ☐ Both of the above

You have passed the understanding checks. Please click Next to proceed to the first stock price chart.

Instructions

Welcome to our study! This is a 15-minute decision-making survey, and you'll earn \$3 just for completing it. Plus, you might get an extra bonus (up to \$3) depending on your decisions and some luck.

The instructions start on the next page. Please read them carefully. We will test your understanding of the instructions, and you need to pass our comprehension checks in order to proceed to the decisions.

Understanding Monthly Stock Price Changes

The survey has 20 rounds. In each round, we will show you a chart of how a company's stock price changed from month to month over a 12-month period in the past 5 or 10 years (see an example below).

Here's what you need to know:

- Each arrow shows the percentage change in the stock price during a given month.
- The arrow starts at 0% for that month and ends at the percentage change from the start to the end of that month.
- For example, if the arrow for a month ends at +10%, it means that during that month, the stock price increased by 10%. If it ends at -5%, it means the price decreased by 5%.
- The values are adjusted for dividends, stock splits, and other rare events.

Your Bonus

- After completing the survey, you may receive a **\$3** bonus, depending on one chart you encounter in the study.
- This chart that determines your bonus is **based on a real company's stock price** from the past **5 or 10** years. We will not tell you which chart it is.
- Your chance of receiving the bonus depends on one of two tasks related to this price chart.

Task 1: Predicting the Stock Price Change

- You'll make a forecast on how much the stock price changed from Month 0 to Month 3 by clicking on the dashed line in the chart.
- For instance, if you think the price will go up by 10%, click at the point corresponding to 10%. If you expect a 5% drop, click at -5%.

Please try it out using the example chart below.

Your forecast is: _____

Task 2: How Confident Are You about Your Forecast?

- After predicting, tell us how likely you think that your forecast is less than 5 percentage points off.
- If you're totally confident, then click on 100%. The more doubt you have, the lower the percentage you should answer.

Please try this task in the example below.

Your previous forecast: [forecast]%

How confident are you that your forecast is within 5 percentage points of the actual stock price change?

Your Bonus

- Your bonus is either \$3 or \$0.
- **The more accurate your forecasts and confidence answers are, the more likely you are to receive the \$3 bonus.**

If you are interested in the details of how the bonus is determined, you may click the button below. You will **not** be tested on these details.

Show bonus details

Your bonus depends on either a forecast or a confidence assessment answer.

- If your bonus depends on a **forecast**, then the closer your forecast is to the actual stock price change from Month 0 to Month 3, the more likely you are to receive \$3. To maximize your chance of earning the bonus, your forecast should reflect **how much you believe the price will change on average**.
- If your bonus depends on a **confidence answer**, then the closer your confidence is to the actual likelihood that the price falls close to your forecast, the more likely you are to receive \$3. To maximize your chance of earning the bonus, you should answer the confidence question based on **your best assessment of how likely the price change ends up close to your forecast**.

Before starting the study, we need to test your understanding of the instructions. Click Next when you are ready. Once you click Next, you can't come back to the instructions.

Comprehension Checks

Which statement is true about the chart that determines your bonus?

- ☐ The chart is made up by the researchers
- ☐ The chart is based on a real company's stock prices

Which of the following can increase your chance of receiving the \$3 bonus?

- ☐ Make accurate forecasts about stock price changes from Month 0 to Month 3
- ☐ Make accurate confidence assessments about your forecasts
- ☐ Both of the above

You have passed the understanding checks. Please click Next to proceed to the first stock price chart.

Main Task (repeated in every round)

Round [round number]

Your forecast is: _____

Your previous forecast: [forecast]%

How confident are you that your forecast is within 5 percentage points of the actual stock price change?

Thank you for answering these questions. Please click next to see a new stock price chart.

Open-Ended Questions
